

Introduction

Most our climbing boards are climbed horizontally and not vertically. The idea is to make it from one side to the other rather than to the top. Users are never any more than a couple of feet from the ground making it safe to step up and down at the start and finish. Matting or safe surfaces is to be used where required and we would always recommend safety surface or matting to be used with all our equipment.

Before Use

- Supervision is always recommended
- Horizontal movement only
- No vertical climbing
- Ensure mats are in place where required
- Proper footwear required
- Remove all Jewellery, scarfs etc.
- One climber per panel at one time
- Check for loose holds

During Use

- Traverse safely from one side to next
- Always maintain 3 points of contact
- Stay in queue
- No Climbing around
- Don't interfere with other users
- Step down when done
- No Jumping
- Enjoy

After Use

- Step away when done
- Stay clear of other users
- Report any defects
- Create new games
- Share your experience

Warning

Climbing indoors and outdoors is an inherently risky sport. The activity of climbing can lead to personal injury. Artificial holds can spin, and on rare occasions break. Individual climbers and organizations have the sole responsibility for learning and using proper climbing technique and safety practices. The purchasers and users of all our products accept full and complete responsibility for any and all damages or injury which may result from the use and/or misuse of any product purchased from SmallWall School Products.
