

## CLIMBING BOARDS MAINTAINANCE

Smallwall Products are made from all-weather material and are built to last but like all products a preventive maintenance programme would be a great addition as well as our Instruction Guide. We recommend that all our products are checked on a regular basis and please take the points below into consideration and always think Safety First.

- Boards can be cleaned down using damp cloth or even a light power hose
- Check all boards regularly to ensure that they are fixed to the wall and no bolts have come loose
- Holds sometimes become loose and spin due to excessive use, make climbers aware of this and ask them to tell you if a hand hold is loose and tighten it immediately with a standard 8mm Allen key
- Replace or remove any damaged holds
- If in doubt seek advice
