About us

SmallWall School Products designs, manufactures and installs a range of affordable playground products for Pre-schools, Schools, Special Schools, Residental Homes and Communities nationwide.

The company is a family run business which was founded in 2018 by Sean Dunleavy. As a coach for a local soccer club, Sean recognised a decline in the development of children's fundamental movement skill and set about designing products for children to engage with.

Our products are targeted at increasing engagement and enjoyment of physical activity in children of all ages and abilities, while at the same time encouraging the development of the childs agility, co-ordination, balance, strength, focus, determination, social inclusion and self regulation skills.

We provide a range of products priced to fit within budget constraints. Our most popular item for schools is the Horizontal Climbing Boards. Children climb across the wall as opposed to climbing up the wall. Boards installed are kept low to the ground and below the critical fall height allowing children to engage in climbing in a safe manner.

Why Choose SmallWall

* Our products are an affordable and fun way of increasing enjoyment of physical activity in children
* Offers an alternative activity on the playground
* Designed to be used by children of all ages and abilities
* Our products encourage the use of fundamental movements
* Encourages social inclusion on the playground
* Climbing products are installed low to the ground and below critical fall height
* Products are easily installed by a school caretaker if required with our guidance

Testimonials

Eimear Byrne Scoil Lorcain, Monkstown
Ordered some climbing boards for Irish speaking primary school. The order, sales and delivery process was efficient and professional. The service was superb with the staff going the extra mile to facilitate the requirement/request to have our safety notice in Irish. Maith sibh!

Ms K Carroll Scoil Bhride, Kilcullen
We have dealt with SmallWall School products on three occasions and every time we were so impressed by their customer service, the ease of delivery which was the next day and the advice and direction we were given in relation to the installation process. Both Sean and Rachael were so helpful, advising us on which products would best suit our students' needs. We have purchased the traverse climbing wall panels for our General Purpose Hall in our school's Autism Unit and our most recent purchase was the ADHD Peg boards. Both products came with very clear instructions for our caretaker to follow, plus Sean was available to offer advice over the phone, if needed. The products have been a great success, helping our students develop core strength, improve motor skills and motor planning, and providing them with much needed proprioceptive input. We would highly recommend Sean and SmallWall School products. It is great to support an Irish company that provides a high level of service to their customers.

Thomas Conneally
I have been privileged to worked with SmallWall for over 3-years now as a service supplier.
I wholeheartedly mean it when I say that Sean & Rachael have been an absolute delight to work with. Always very diligent, always very professional, and all the while; - very human!
SmallWall are the quintessential of a family-run business, and their unmatched passion and commitment is a direct reflection of this.
Amazing workmanship. Amazing customer-service. Amazing people.

Principal School
Excellent product and service. The children love using the climbing walls at lunchtime. They are safe, enjoyable and climbing activities can be varied to suit all levels.

Alejandra Gomez Oatlands Montessori
Amazing climbing wall, children love it!

Shillelagh No. 1 NS Wicklow
The traversing wall is a product which I would recommend to any school. The children engage regularly with it, building their stamina. SmallWall were very efficient and easy to deal with and it is great having such a company based in Ireland.

Leonie Passmore Scoil Mocheallóg Kilmallock
Wonderful products and service. A please to work with Sean and his team. Would highly recommend.

Nuala Ní Sheaghdha Scoil Mhuire, An Tuairin
SmallWall are a fantastic company to deal with from start to finish. Our climbing wall was installed in the shelter and has given something fun to do on the wet days. It has given a great slash of colour to our playing area and it's wonderful to see the children improving their strength and pace since it was fitted.

Noelle Mac Donagh Saint Brigids, Castleknock
The climbing wall is amazing and such a huge hit with the children. They love taking part and it is a great core workout that everyone can complete.We use it during PE and we have even extended it's use to our Infant classes who climb with a buddy from 6th helping

Principal Padraic Fay St Josephs School Dun Laoghaire
We bought 15m of horizontal wall boards from small walls.
From the moment that I contacted the Smallwall office until the boards were in place the experience could not have been easier.
Seán gave excellent help at all stages and no query was left unanswered.
The climbing boards are of excellent quality and are extremely safe. The pupils in St Joseph's have not stopped using them since they were installed.
There is a queue every day at breaktime.
I have no hesitation recommending SMALLWALL

Maeve McCarthy Rathfarnham ETNS
SmallWall School Products were a pleasure to deal with . The ordering and delivery process was straightforward and clear instructions were provided to the caretaker for installation. Our children are certainly enjoying our new traverse/climbing wall

CLIMBING PRODUCTS

Horizontal Climbing Boards

Benefits:
Ideal for beginners, pre-schools and special needs education.
Climbing moves can be performed and practiced in a variety of ways.
Uses fundamental movements such as agility, balance and co-ordination.
Attractive design encourages participation in physical activity.
Improves hand eye co-ordination skills.
Ideal for movement breaks.

Features:
Ideal way to introduce children to climbing safely.
Our most popular school product.
No special knowledge or skills required by supervisors.
For indoor and outdoor installation.
Ideal for installation on walls and fences.
Made from recycled plastic.
Low step down.
Installed below critical fall height.

Installation:
Here at SmallWall we are driving Children across the wall not up the walls. Our Horizontal climbing boards are installed at an average height of 1,700mm from ground to top of top board. A distance of 600mm between ground and top of bottom boards ensures boards are fixed below the recommended critical fall height. SmallWall installation team available if required and boards can be fixed onto suitable walls and fencing. Please note our boards are made from plastic and may warp slightly on sunny days but will always return to shape.

Dimensions
Length: 1200mm · Height: 400mm · Depth: 100mm

CLIMBING PRODUCTS

Children and young people with intellectual disabilities and other cognitive disabilities such as ADHD, ASD, ADD, ODD can benefit greatly from the Occupational Therapy that using their own body weight to work hard and in turn to ground themselves can bring.

People with poor muscle tone will benefit from being able to pull themselves up to the wall. This is an activity that is high intensity but does not require running around or much prior fitness to get started.Having to concentrate on your hands and feet and make decisions and setting a challenge for yourself all at the same time.

There are huge benefits of emotional regulation from using a climbing wall. Using high levels of concentration and coordination and being associated with an early experience of goal achievement all hugely benefit emotional regulation. Something which many of the children and young adults with disabilities struggle with.

This type of high intensity exercise forces us to "disengage from negative stimuli" and helps us let go of unhelpful thinking patterns. This is so helpful for people who suffer from anxiety.

SmallWall Horizonal Climbing Boards are an ideal addition to the school playground. Climbing moves can be performed and practiced in a variety of ways.

Our climbing boards are designed for children to move horizontally in a safe manner and at a height that is easy to step down from. To move efficiently across involves using skills such as concentration, agility, balance, co-ordination, centre of gravity and weight transfer.

The boards can be mounted on suitable fencing, existing astro-turf arenas or fixed onto solid walls in schools using appropriate fixings.
Indoors or outdoors.

Climbing Bridge

Benefits:
Ideal for beginners, pre-schools and special needs education
Use fundamental movements such as agility, balance and co-ordination
Step down minimal for ease of use
Features:
Ideal way to introduce children to climbing safely
No special knowledge or skills required by supervisors
Ideal for placement on level grounds
Mats can be added if required
Made from recycled plastic

Installation
No installation is required for the Climbing Bridge. It has a stepdown close to the ground which is more suitable to beginners. Rubber mats are an ideal addition to this product.

Dimensions
Length: 2080mm
Height: 700mm · Depth: 1225mm

A-Frame

Senior A Frame

GAMES TABLES

Smallwall have designed a range of games tables and pads to cater for children who are not fans of ball sports on the playground. The tables are made from robust recycled plastics and come with extra large game pieces. No assembly is required. Just drop into place and commence play.

Benefits

Enjoy a healthy form of entertainment with a challenging game of Chess / Draughts, Ludo or Snakes and Ladders on the school playground.

Benefits of these games in general are:

- Develops perspective
- Elevates creativity
- Boosts planning skills
- Helps ADHD
- Improves patience and perseverance especially the snakes and ladders game
- Develops social and self-awareness skills
- Helps raise IQ scores
- Improves decision making and problem-solving skills
- Can be used as a distraction when emotions are heightened

All weather materials with large game pieces. For use in indoor or outdoor setting. Encourages concentration, pattern recognition, decision making, algebraic and geometric thinking, problem solving, spatial reasoning and critical thinking skills on the playground. Mix and match our games options of Chess/draughts or Snakes and Ladders or Ludo to create the perfect games table for your school

GAMES TABLES

Table Options

Option 1
Single Table with stools sold separate or use classroom chairs.
Length: 585mm
Height: 585mm • Width 585mm

Option 2
All in one Single Table and 2 attached stools
Length: 1185mm
Height: 585mm • Width: 585mm

Option 3
Double Table with stools sold separate or use classroom chairs.
Length: 1145mm
Height: 585mm • Width: 585mm

Option 4
All in one Double Table & 4 attached stools
Length: 1185mm
Height: 585mm • Width: 1185mm

Option 5
New Option for Secondary Students with 4 attached stools
Length: 1660mm
Height: 680mm • Width: 1660mm

All games tables are made to manufacture and come with a 1 year warranty

Note: As all our products are mostly made from recycled plastic, when exposed to long term sun, warpage is a common occurrence. All products will return to its original shape when cooled down. Placement of products in a sheltered area or not in direct sunlight, would be an ideal solution to avoid this from happening.

GAMES PADS

The games pad is a mini version of the games table which can be carried by the student and easily used in any location. There are four game choices to choose from – chess/draughts or snakes and ladders or ludo or X & O.

Benefits
Enjoy a healthy form of entertainment with a challenging game of Chess / Draughts, Ludo, X & O or Snakes and Ladders on the school playground or in the classroom. Benefits of these games in general are:

- Develops perspective
- Elevates creativity
- Boosts planning skills
- Helps ADHD
- Improves patience and perseverance especially the snakes and ladders game
- Develops social and self-awareness skills
- Helps raise IQ scores
- Improves decision making and problem-solving skills
- Can be used as a distraction when emotions are heightened

All weather materials with large game pieces. For use in indoor or outdoor setting. Encourages concentration, pattern recognition, decision making, algebraic and geometric thinking, problem solving, spatial reasoning and critical thinking skills.

Dimensions: Length: 560mm • Depth: 12mm • Width: 595mm

PLAY TABLES & SEATING

Messy Play Tables

Senior Messy Table

Benefits:
The Messy Table is a versatile outdoor or indoor activity teaching and learning table with multiple uses. It can also be used as a mud kitchen or as a tabletop chalk board. It can be used for lego storage & for building.
This piece of furniture can be purchased using the Minor Works Grant or can be applied for under the Furniture and Equipment Scheme.
Of particular interest to Special Schools, we have seen some schools use the tables to incorporate the TEACCH® Autism Program method of teaching, allowing pupils using TEACCH® to move from activities in each bowl one at a time.
A number of pupils can play together or side by side at this activity table to encourage parallel play and peer learning.
ASD classrooms attached to mainstream schools find it encourages integration as all pupils enjoy the novelty of the activities that can be planned around the table.
Useful in special schools where the playground needs to be meeting the needs of a wide variety of ages, it can be used for simple sorting lessons for the younger junior school pupils and ideal for messy science lessons with senior pupils.
Variable leg length available on the Stand Up Junior and Senior tables.
Junior Table caters for pods of 4 children.
Made from recycled material.

Seated Messy Play Table

Cosy Cocoon

On a busy playground it's important to respect that some children's needs include the need for a safe, quiet and cosy space where they can relax.

Some will use the space to engage in self-regulation and practice their calming techniques if they are finding the playground overwhelming. This is particularly true for young people with autism and people with sensory difficulties. From time to time for example young people with ASD need this time and space away from the Hustle bustle of a busy playground. By having a section of the playground devoted to a hub of cosy cocoons (or even just one or two) these young people know they have a safe space to use should they need it. They do not need to go inside to find a calm space and can be supervised easily as they can be seen from two sides.

Please note cocoons are designed only for seating purposes. We do not recommend children climb on top or swing from any part of the product as this can damage components and fixings"

Benefits
Safe quiet cosy place where older children can relax and self regulate when outside
Suitable for young and older children with autism and sensory difficulties
No special knowledge or skulls required by supervisors
Ideal for placement on level ground
Made from recycled plastic
Available in two sizes
No fixing require – product is delivered assembled

Dimensions

Double Hole Ground Target – Length: 500 · Height: 860 · Width: 550

Portable Rocker

Benefits:
Benefits of a Rocker on the Playground are:
• Ideal product for ASD units and Classes
• Helps to calm the nervous system and reduce sensory overload while self-regulating/soothing during moments of anxiety or distress
• Provides & offers a controlled and safe alternative movement to pacing/rocking on chairs or floor
• Useful as part of a sensory break or calm area
• Suitable for a range of ages and needs

Features:
• All weather, recycled plastics materials
• Portable
• Stainless steel fixings and hardware
• Built in handles
• No splinters, low maintenance

Dimensions:
Length 1200 mm · Height 720 · Width 600

Rocking Chairs

Benefits:
Provides soothing vestibular input that helps neurodivergent children feel calm, regulated, and ready to engage.
Rocking is often a self-soothing movement – this chair offers it safely and predictably.
Supports Nervous system regulation
Aids in Reducing anxiety & sensory overload
Improves focus and emotional control
Curved seat and side panels create a secure, contained feel while enhancing body awareness, helping children stay grounded without disruptive movement.
Natural motion means kids don't have to "sit still" to participate — leading to greater comfort, fewer meltdowns, and more successful learning and play.

Features:
- All weather, recycled plastics materials
- Stainless steel fixings and hardware
- Easily Cleaned
- No splinters, low maintenance

Dimensions:
Single - Length 560 mm · Height 890 · Width 850
Double - Length 920 mm · Height 1150 · Width 850

BALANCE BOARDS

Option 1: Senior Balance Board - Steel Frame:

Option 2: Senior Balance Board - All Plastic:

Option 3: Junior Balance Board - All Plastic:

Benefits and Features
Ideal for children from preschool age to primary level and ASD Classes
Encourage development of fundamental movements such as agility, balance and co-ordination

School Pool

Using your foot to pot the pool balls in the pockets instead of a traditional pool cue. This fun football/pool game gives you the best of both worlds.

Benefits

• Physical Development – Improves balance and coordination.
• Maths Skills – Encourages counting, scoring and basic addition.
• Colours & Numbers – Helps children recognise colours, numbers and sequences.
• Focus & Accuracy – Develops concentration and aiming skills.
• Teamwork – Encourages cooperation and social skills.
• Confidence – Builds confidence through play.
• Active Fun – Promotes exercise and outdoor learning.

Features

• Made from durable, all-weather recycled plastic.
• Lightweight design for easy transport and assembly.
• Suitable for indoor and outdoor use.
• Can be set up on almost any flat surface.
• Suitable for all ages, including teachers.
• Combines pool-style gameplay with the fun and energy of football.
• Comes with 16 size 3 balls

Dimensions

Internal Play Area:
L3850mm X W2000mm x H150mm

Recommended Play Area:
5000mm (Length) X 3000mm (Width)

NEW for 2026

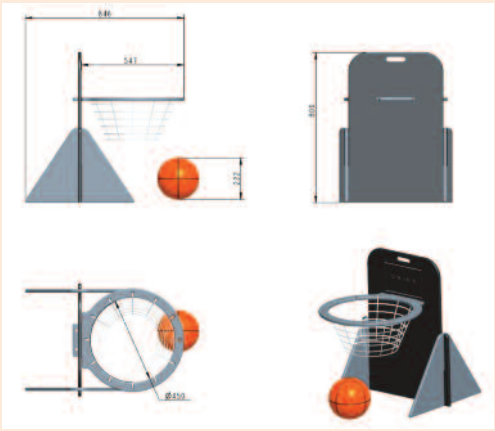

The SchoolPool rules are like those of a traditional pool table, and the skills can also be replicated.

Mini Basketball Stand

Benefits:
Individual or Team Games
